

Programming the front end is easier when you use HTML from the get go. Therefore we will have a folder of the front end design before putting it into a php filetype since visual studio code will help us with the autocomplete of it all.

We also decided to use php because it's used in the field a lot and we think honing our skills with it will be useful.

❖ Front End:

➤ StyleSheet.css

- Housing a lot of different classes and ID this is as CSS is, customization like the changing of colors, fonts, backgrounds, so on and so forth.

➤ Index.html

- Use a lot of javascript
 - Allowing to hide certain fields i.e guests shouldnt be able to see the drop down of the different things you can go to nor should they see the filters.
- This is the main home screen showing the animes of the most popular, recently added and the recently reviewed by friends.
 - Navbar
 - ◆ Normal/Admins NavBar
 - Left - Brand Name
 - Middle - Search Bar
 - Right - Hamburger
 - Watch Later
 - Friends
 - Albums
 - Settings
 - Log out
 - ◆ GUESTS NavBar
 - Left - Brand Name
 - Middle - Search Bar
 - Right - Log In Link
 - Aside (LEFT 20%)
 - ◆ Filter - LEFT
 -
 - Most Popular - (RIGHT 80%)
 - Footer
 - ◆ Left - Brand Name
 - Genre - Drop Down

- Display different genres
- Watched Status - Radio
 - Watched (if marked as watched)
 - Unwatched (if anime isn't marked)
- Ratings - Radio
 - High -> Low
 - Displayed highest rated animes first from left to right
 - Low - > High
 - Displayes lowest rated animes first from left to right.
- Login.html
 - Will be the log in page when someone clicks to be logged in
 - Navbar (Will just be a color)
 - Container
 - Centered
 - Anamedia
 - Log In (title)
 - Username/Email (Text box)
 - Password (Text box)
 - Log in (Button)
 - Ask user if they don't have an account they can sing up
 - Footer will just contain the Anamedia on the bottom left
- Signup.html
 - Animedia Title
 - Sign up h3
 - Row
 - Left - email
 - Down -Text box
 - Right - username
 - Down - text box
 - Row 2
 - Left - Row
 - Down - Text box
 - Right - Retype Password
 - Down - text box
 - Row 3
 - Left - Blank
 - Middle - Phone number
 - Down - Text box

- Right - Blank
- Row 3
 - Similar to row 2 but instead of middle being phone number and down being a text box it will just be a Sign up button.
- Friends.html
 - Same navbar as the rest
 - Users
 - Display every user
 - Friends (under friends)
 - Display the users that has a common
 - Aside - Right
 - People who the users follow
 - People who are following the user
- Albums.html
 - Same navbar as the rest
 - Nav to hold the content
 - Top right will be the name of the user
 - Middle of the carousel of the top 5 photos of the anime (just a slideshow bootstrap has it)
 - Bottom Custom Description
 - The nav with the content should be a row of up to 5 different lists before moving down to the next ones
- SAlbums.html
 - First would be the name of the list
 - Followed by the user
 - After that it would be a button that would lead the user (if correct user) to the page to add the anime.
 - Then it would be similar to the albums by only printing out the photo of the anime at least 5 times before moving down to the next row.
- Search.html
 - If the user clicks the search button without having anything in the filter or the search bar then it should display just a blank dark gray box with nothing
 - Meanwhile when something is searched it should pop up as a 7 anime cross before it goes down a row.
- AnimeInfo.html
 - It should look similar to the record insert but just have all the information already inserted into it.
 - Show title

- Photo
- Description
- Where to find it
- Rating
- User
 - Container
 - Top of container
 - ◆ Username
 - ◆ Membership level
 - ◆ Top right should contain the friend code
 - ◆ Bottom right should have the Add/Remove friend
 - Bottom of container
 - ◆ Display animes listed as watched
 - ◆ Display animes listed as favorite
- Setting.html
 - Display different settings based on the user if they're an admin or not. This should be done through js
 - Normal users should see
 - Preference
 - Change Email
 - Change Password
 - Admins should see
 - Disable user
 - Delete Listing
 - Edit Animes

B: I have no idea what part B means
